

FROM CARE WORKFLOW TO MISSION CAPABILITY

MEDkeen Solutions® helps federal agencies, primes, and research partners turn complex healthcare and operational requirements into applications, simulations, training, and executable programs. Our nurse-led team works at the intersection of healthcare operations, care management, applied AI, cloud development, research, and modeling and simulation. We support capture through workforce adoption, translating clinical and mission needs into practical delivery.

CORE CAPABILITIES

FEDERAL HEALTH AND PROGRAM OPERATIONS

- Program and project management, capture, solutioning, transition, and integrated workstream support
- Healthcare operations, care management, clinical workflow redesign, and patient and customer experience
- Stakeholder engagement, program controls, implementation planning, and operational adoption

AI, CLOUD AND APPLICATION DEVELOPMENT

- Cloud-native web and mobile applications, prototypes, APIs, dashboards, and decision-support tools
- AI-enabled workflows, knowledge access, operational intelligence, and responsible human oversight
- Data architecture and governance, user experience design, integration, and DevSecOps support

RESEARCH, MODELING AND SIMULATION SUPPORT

- Applied research coordination, clinical subject matter expertise, requirements, and evaluation design
- Medical and operational scenario design, data requirements, human factors, and workflow interpretation
- Experimentation, verification and validation, user acceptance, and translation of findings into operations

WORKFORCE READINESS AND TRAINING

- Training and curriculum development, exercise support, and simulation-based or immersive learning
- Standard operating procedures, process redesign, readiness assessments, and technology adoption
- Continuity planning, mission resilience, implementation support, and operational transition

SELECTED CLIENT EXPERIENCE

COMPANY DATA

Legal Name: MEDkeen Wealth Solutions, LLC
DBA: MEDkeen Solutions®
Founded: 2016 | Florida LLC
CAGE: 97HM9
UEI: D9RUU5PYELB4
Status: EDWOSB/WOSB | Military Spouse Owned

DIFFERENTIATORS

- Nurse-led clinical-to-technical mission integration
- 25+ years across managed care, acute and post-acute care, hospice, primary care, pharmaceuticals, and consulting
- Bridges clinicians, operators, researchers, developers, and decision makers
- Flexible prime, subcontractor, or healthcare workstream lead
- Central Florida modeling and simulation ecosystem with AFCEA Orlando leadership
- R3 Global Response joint venture collaboration and research teaming ecosystem

PARTNERING FIT

- Prime or workstream lead for federal health and medically oriented AI
- Specialized subcontractor for clinical operations, research, modeling and simulation, training, and adoption
- Joint venture contributor bringing healthcare domain leadership and emerging technology integration
